ROCKET-PO$
Power & Performance Point of Sale

Rocket-POS is one of the most feature rich and powerful point of sale software programs available. Inventory Management, Customer Tracking, Purchase Orders, and Easy to Use Interfaces are just the beginning of what Rocket-POS can do for your business.

Rocket-POS will allow your business to grow in both sales and profit while saving you time. By accurately tracking inventory and sales you can reduce shrinkage and increase profit lines while reducing over ordering and maintaining accurate stock levels.

This powerful point of sale software utilizes the latest in Microsoft technology compatible with Windows 98 / NT / 2000 / and XP. Rocket-POS is compatible with many different peripheral hardware configurations, making transition from an existing system easy and affordable.
